1. Introduction & Purpose of UAT

This document is your guide for the User Acceptance Testing (UAT) phase of the Rosalyns Beach Hotel Management System. UAT is the final stage before the system goes live with real guests and real transactions.

During UAT, you — the hotel team — will use the system exactly as you would day-to-day. Your goal is to confirm that every feature works correctly for your specific operations and to raise any issues before production launch.

UAT is NOT about finding technical bugs — it is about verifying that the system does what YOU need it to do, in the way YOU need to do it.

UAT PERIOD

Start Date: 16 May 2026

Target End: 30 May 2026

Go-Live: 1 June 2026

Issues to: johnpaulchirwa@pro-managed-it.com | WhatsApp +353 860 081 635

2. What Is In Scope for UAT

› Front Desk / Reservations	Room bookings, check-in, check-out, invoicing, payments, refunds
› Restaurant POS	Walk-in, dine-in, takeaway and room service orders, tabs, shift close
› Kitchen Display (KDS)	Viewing and bumping food orders from the kitchen screen
› Bar Display (BDS)	Viewing and bumping bar orders
› Coffee Display (CDS)	Viewing and bumping coffee orders
› Conference & Events	Enquiry management, payments, balance tracking
› Housekeeping	Room status management — clean / dirty / maintenance
› Stock Management	Receiving stock, wastage logging, stock counts
› Reports & Analytics	Z-reports, payment summaries, stock reports, occupancy
› Reviews Management	View, approve, and reject guest reviews; import web feedback via scraper
› Admin / Settings	Site settings, user management, menu management

3. System URLs

All system screens are accessible at the following URLs. Bookmark these on every device you plan to use.

SCREEN	URL	WHO
Public Website	https://promanaged-it.com/rosalyns-hotel/	Guest-facing
Admin Dashboard	https://promanaged-it.com/rosalyns-hotel/admin/	All staff login here
Room Bookings	https://promanaged-it.com/rosalyns-hotel/admin/bookings.php	Front desk
POS Till	https://promanaged-it.com/rosalyns-hotel/admin/pos.php	Restaurant
Kitchen Display	https://promanaged-it.com/rosalyns-hotel/admin/kds.php	Kitchen screen
Bar Display	https://promanaged-it.com/rosalyns-hotel/admin/bds.php	Bar screen
Coffee Display	https://promanaged-it.com/rosalyns-hotel/admin/cds.php	Coffee screen
Housekeeping	https://promanaged-it.com/rosalyns-hotel/admin/housekeeping.php	Housekeeping
Stock Dashboard	https://promanaged-it.com/rosalyns-hotel/admin/stock-dashboard.php	Stock team
Reports	https://promanaged-it.com/rosalyns-hotel/admin/reports.php	Management
Shift Z-Report	https://promanaged-it.com/rosalyns-hotel/admin/shift-close-report.php	End-of-shift
Reviews	https://promanaged-it.com/rosalyns-hotel/admin/reviews.php	Manager

4. UAT Login Credentials

Use the following account for all UAT testing. It has Manager-level access to every operational feature.

UAT TEST ACCOUNT — MANAGER ACCESS

Login URL	https://promanaged-it.com/rosalyns-hotel/admin/
Username	rosalyns_uat
Password	RosalynsUAT2026!
Access Level	Manager — full operational access

IMPORTANT: These credentials are for UAT only. They will be removed / changed before go-live.

5. Staff Role Accounts

These accounts are pre-configured. Each role sees only what is relevant to their job.

ROLE	USERNAME	CAN ACCESS
Front Desk	receptionist	Bookings, check-in/out, payments, invoices, housekeeping
Restaurant Staff	fnb1 / fnb2	POS till, tab management, order dispatch, shift close
Chef / Kitchen	chef1 / chef2	KDS — kitchen ticket display and bump board
Bar Staff	bar1 / bar2	BDS — bar ticket display and bump board
Coffee Bar	coffee1	CDS — coffee display and bump board
Manager (UAT)	rosalyns_uat	All of the above plus reports, stock, shift close

Contact ProManaged IT for individual staff passwords before go-live.

6. Key System Concepts — Read Before Testing

6.1 POS Order Types

The POS supports four order types. Each behaves differently:

Walk-in:	Customer pays immediately at the counter. Click Pay & Send — payment is collected now, order fires to kitchen.
Takeaway:	Same as walk-in. Click Pay & Send — customer pays before they leave.
Dine-in:	Customer is seated at a table. Click Fire — order goes to the kitchen and the tab stays OPEN. Payment is collected at the end of the meal from the Tabs tray.
Room Service:	Order goes to a guest's room. Click Fire — charge is added to the guest folio and settled at checkout.

RULE: Walk-in & Takeaway orders = PAY & SEND (settle now) | Dine-in & Room Service orders = FIRE (settle later)

6.2 Tabs Tray — Dine-in Settlement

When a dine-in order is fired, it appears in the Tabs tray (top right of POS). When the guest is ready to pay, click the table in the Tabs tray to reopen it, then click Pay Existing to settle.

6.3 POS / KDS Live Notifications

The POS polls KDS/BDS/CDS updates every second. Ready-for-collection and station-message popups stay visible for 2 minutes, can be closed with the X button, and include a small ordered-item summary. POS and station devices have sound settings for alert choice and volume. Station tickets show FOH/orderer and guest/service metadata, action buttons spin while saving, and friendly dialogs explain already-paid tabs, short-stock ingredients, and no-pending-action states. The My Orders panel in the bottom-left updates within about 1 second when stations mark items ready, collected, or served.

6.4 Shift Close — Z-Report

At the end of each shift, staff click Close Shift on the POS and declare how much cash is in the till. The system calculates expected cash, variance (over/short), revenue by payment method, order type, and top-selling items. A printable Z-Report is generated — this must be signed and filed each day.

6.5 Booking Payments & Refunds

Room and conference bookings support multiple payments (deposit, balance, extras) and partial or full refunds. Each payment generates an invoice. Refunds are tracked against the original payment and the booking balance updates automatically.

6.6 VAT

The system applies 16.5% VAT to all applicable transactions. VAT is calculated server-side — it cannot be overridden from the POS. Invoices show a clear VAT breakdown.

6.7 Currency

All amounts are in Malawian Kwacha (MWK). Format: MWK X,XXX — not dollars, not euros.

7. UAT Test Scenarios

Work through each scenario in order. Tick the checkbox when done. Flag anything that doesn't match the Expected result.

SCENARIO / STEPS / EXPECTED RESULT

1 Walk-in Coffee Order

1. Open POS
2. Select Walk-in as order type
3. Add 2x Coffee to the cart
4. Click Pay & Send
5. Select Cash, enter the amount

Expected: Receipt shown. Order appears on Coffee Display (CDS). Payment recorded in the shift total.

2 Dine-in Table Order — Fire to Kitchen, Settle from Tabs

1. POS ? Dine-in, enter table number
2. Add food and drinks
3. Click Fire
4. Check KDS (food) and BDS (drinks) — tickets must appear on the right screens
5. Kitchen marks items Ready / Collect / Serve
6. Confirm POS ready popup stays visible and My Orders updates
7. Return to POS ? open Tabs tray (top right) ? find the table
8. Click to reopen ? Pay Existing ? settle

Expected: Order fires to correct stations. POS shows ready popup within about 1 second with item summary. My Orders updates promptly. Settlement clears the tab and records payment.

3 Room Service Order

1. POS ? Room Service
2. Enter the room number
3. Add items
4. Click Fire
5. Verify ticket appears on KDS

Expected: Order fires to KDS. Charge linked to the guest folio. Settled at checkout.

4 Takeaway Order — Mobile Money

1. POS ? Takeaway
2. Add items to cart
3. Click Pay & Send
4. Select Mobile Money as payment method

Expected: Payment confirmed. Order fires to kitchen. Mobile money amount recorded in the shift report.

5 Shift Close — Z-Report

1. At end of a test shift, click Close Shift in the POS
2. Declare the cash amount in the till
3. Review the Z-Report summary on screen
4. Click Print

Expected: Z-Report shows total revenue, payment method breakdown, cash variance, and top 10 items. Printout matches shift totals.

7. UAT Test Scenarios (Continued)

SCENARIO / STEPS / EXPECTED RESULT

6 Room Booking + Deposit Payment + Invoice

1. Admin ? Bookings ? Create Booking
2. Select room, dates, and guest name
3. Confirm the booking
4. Add a deposit payment
5. Open the invoice

Expected: Booking created at correct rate. Deposit recorded. Invoice shows correct total with VAT breakdown.

7 Booking Partial Refund

1. Open an existing paid booking
2. Admin ? Payments ? click Refund on a payment
3. Enter a partial refund amount
4. Confirm

Expected: Refund recorded. Booking balance updated. Refund invoice generated.

8 Conference Enquiry — Deposit then Balance

1. Admin ? Conference Management ? open an enquiry
2. Add a deposit payment
3. Add the final balance payment
4. Check the outstanding balance shows zero

Expected: Balance is correct at each step. Both payments visible. Balance reaches zero after full payment.

9 Housekeeping Status Update

1. Log in as receptionist
2. Open Housekeeping
3. Mark one room as Cleaned
4. Mark another as Maintenance Required

Expected: Room status updates immediately. Colour-coded change visible on the room dashboard.

10 Stock Receipt Delivery

1. Admin ? Stock ? Receive Stock
2. Select supplier and ingredient
3. Enter quantity and unit cost
4. Submit

Expected: Stock level increases. Batch recorded with correct cost. Stock dashboard reflects new quantity.

11 KDS / BDS / CDS Display

1. Open KDS on a separate device or browser tab
2. Fire an order from POS
3. Watch the ticket appear within a few seconds
4. Mark items Ready / Collect / Serve
5. Check POS notification popup and My Orders panel

Expected: Ticket appears promptly. POS receives station updates within about 1 second. Ready popup lists ordered items, stays for 2 minutes, and can be closed with X.

7. UAT Test Scenarios (Continued)

SCENARIO / STEPS / EXPECTED RESULT

12 Payments CSV Export

1. Admin ? Payments
2. Filter by today's date
3. Click Export CSV
4. Open the file in Microsoft Excel

Expected: CSV downloads. All columns present. No formula injection characters (=, +, -) in amount cells.

13 Review Scraper — Find Web Reviews

1. Log in as Manager
2. Go to Admin ? Reviews
3. Click Find Web Reviews
4. Search term pre-filled with the hotel name — click Search
5. Review the candidate list returned from DuckDuckGo / Bing
6. For a positive candidate, set rating, handle, and status (Pending or Approved)
7. Click Import

Expected: Candidates list appears within 15 seconds. Each card shows title, snippet, and source URL. Import saves the review; if status is Approved it immediately appears on the public website reviews section.

14 Review Management — Approve, Reject, and Delete

1. Admin ? Reviews
2. Find a Pending review (imported or guest-submitted)
3. Click Approve — confirm status changes to Approved
4. Find another review — click Reject — confirm it disappears from public view
5. Delete a test review

Expected: Status transitions work correctly. Approved reviews appear on the public website. Rejected and deleted reviews do not.

8. Pre-Go-Live Configuration Checklist

Before the system goes live, confirm every item below. Contact ProManaged IT for anything that needs changing.

☐	Hotel name & address	Admin ? Settings	<i>Rosalyns Beach Hotel, Matuwi Village, Mangochi</i>
☐	Phone numbers	Admin ? Settings	<i>+265 888 226 665 and all cell numbers</i>
☐	Hotel email address	Admin ? Settings ? Email	<i>Main guest contact email</i>
☐	VAT rate	Admin ? Settings ? Finance	<i>16.5% — confirm with your accountant</i>
☐	Room types & rates	Admin ? Room Management	<i>All room names, capacities, and nightly prices</i>
☐	Menu items & prices	Admin ? Menu Management	<i>All items, categories, prices, station routing</i>
☐	Staff user accounts	Admin ? User Management	<i>Every staff member has own login with correct role</i>
☐	Station assignments	Admin ? Station Settings	<i>Chef ? KDS, Bar ? BDS, Coffee ? CDS</i>
☐	WhatsApp number	Admin ? Settings ? WhatsApp	<i>Guest notification number confirmed</i>
☐	SMTP / Email settings	Admin ? Settings ? Email	<i>Send a test email — confirm delivery</i>
☐	Booking confirmation template	Admin ? Email Templates	<i>Review wording before real guests receive it</i>
☐	Cash float	Physical setup with management	<i>Starting float agreed for each shift</i>
☐	Printer / receipt test	POS device — browser print	<i>Test print a receipt and a Z-report before go-live</i>
☐	Reviews — scraper search	Admin ? Reviews ? Find Web Reviews	<i>Run a test search; confirm candidates return for hotel name</i>
☐	Reviews — initial import	Admin ? Reviews	<i>Import 2–3 quality web reviews; approve and confirm they show on the public website</i>

9. How to Report Issues During UAT

When something doesn't work correctly, please provide:

1. Which screen you were on (e.g. "POS — Walk-in order")
2. What you did — step by step
3. What you expected to happen
4. What actually happened
5. A screenshot if possible (phone camera is fine)
6. The approximate time (so we can check system logs)

REPORT ISSUES TO

JP Chirwa — ProManaged IT

Email: johnpaulchirwa@pro-managed-it.com

WhatsApp: +353 860 081 635

10. Important Notes

- Live database.** Any entries created during UAT are in the live database. Mark all test entries clearly (e.g. guest name: "UAT TEST"). ProManaged IT will clean test data before go-live.
- No real payments.** Use MWK 1.00 test amounts. No real money should flow through the system until go-live.
- Passwords will change.** The UAT password (RosalynsUAT2026!) is temporary. All staff accounts will be re-issued with secure, private passwords before go-live.
- Internet required.** The system is cloud-hosted. A stable connection is needed. Mobile 3G/4G is sufficient for POS and KDS screens.
- Load shedding.** The POS and KDS have offline indicators. Complete open transactions before power is cut where possible.
